

SAGAR CEMENTS (M) PRIVATE LIMITED

(A Subsidiary of SAGAR CEMENTS LIMITED)

SCMPL/ENV/EC/2024-25

Date: 01.05. 2025

To,
The Director,
Regional Office (Western Zone)
Ministry of Environment & Forests
Kendriya Paryavaran Bhawan
E-5, Arera Colony, Link Road -3,
Ravishankar Nagar, Bhopal (M.P.)-462016

Sub: Submission of Compliance report of stipulated conditions in Environment Clearance of M/s. Sagar Cements (M) Private Limited at village- Karondiya Tehsil- Gandhwani, District- Dhar(M.P.) for the period from October- 2024 to March- 2025.

Ref: Environmental Clearance Letter No. 1498/SEIAA/2019 , date- 3.07.2019 and 1043/SEIAA/2023 date - 03.08.2023

Dear Sir,

As per above subjected letter, we are enclosing herewith Environment Clearance Compliance report for the period of **October- 2024 to March- 2025** of Sagar Cements (M) private Limited , Village - Karondiya , Post- Jeerabad, District- Dhar (MP) for your kind information please.

Thanking you,

Yours faithfully
For Sagar Cements (M) Private Limited.

Niraj Kumar Shrivastava
Vice President (Works)

Cc to

Name of the Project : Sagar Cements (M) Private Limited
Village- Karondiya , Post - Jeerabad, Tehasil - Gandhwani, District- Dhar (M.P.)

Project Code : 5754/2018

Clearance Letter No : 1494/SEIAA/2019 Date - 3.07.2019 & 1043/SEIAA/23 Date 03/08/23

Period of Compliance Report : October - 2024 to March- 2025

S. No.	A. Specific Conditions	Compliance
1	PP should ensure to use water from river as per approval of WRD and there should be no extraction of ground water.	Agreed. We has been taken approval from WRD for extraction of water from river and using water from river only. There is no any ground water extraction in the plant. Approval copy enclosed. Annexure-1
2	All the treated waste water shall be recycled and reused in the processor for dust suppression and green belt development. No process waste water shall be discharged outside the factory premises and 'zero' discharge should be adopted.	No Wastewater is generated in cement manufacturing process . Only STP treated wastewater is being used for green belt development and WHR waste water is being used for dust suppression on road & plantation. There is not being any process water discharge outside the factory premises. The process water is recycled in the plant and Zero discharge is being maintained.
3	PP should Install online pollution control monitoring system in the plant premises.	We have been installed four online Continuous Emission Monitoring System (CEMS) in the stacks viz. Cooler ESP stack, Raw mill and kiln bag house stack, coal mill stack and cement mill stack. We have also installed two On-line Continuous Ambient Air Quality Monitoring Station (CAAQMS) and the data on real time basis is being transferred to servers of CPCB MPPCB. Photographs are given below.

Opacity Meter(Cooler ESP Stack)

Opacity Meter (RM+Kiln Bag house Stack)

Opacity Meter(Coal Mill Stack)

Opacity Meter (Cement Mill Stack)

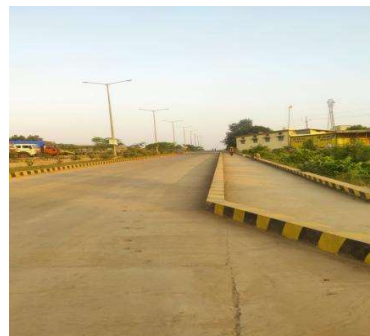

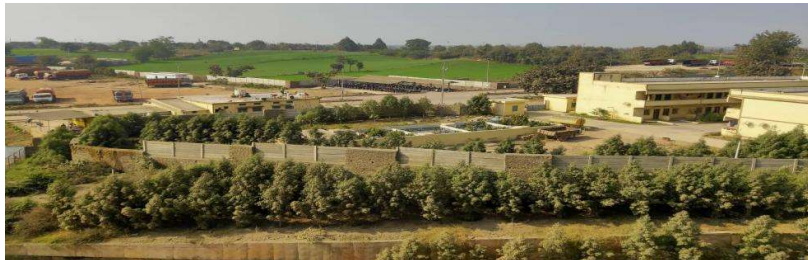

(CAAQMS)

4	PP should ensure to disposal of solid waste as per CPCB/MPPCB Norms.	There is no any solid waste generation from the cement manufacturing process. Dust collected from air pollution control equipment (Bag Filters) are being totally recycled in the process.
5	PP should construct settling tank after proper filter media for rainwater harvesting.	Settling tank with proper filter media has been made for rainwater harvesting. Twelve number of recharge borewell with water recharge pit has been constructed for rainwater harvesting.

Photographs of rainwater harvesting pits-

6	<p>PP should installation of photovoltaic cell (solar energy) for lighting common areas, LED light fixtures and energy efficient equipment's.</p>	<p>Agreed. We have provided LED lighting in all office area. Star rated energy efficient equipment's are being provided. Solar Energy system is installed.</p> 
7	<p>All the parking area of truck for transportation of raw material and finished products should be properly paved and concreted to reduce dust pollution. The service road and staff road should be developed separately.</p>	<p>Parking area of trucks for transportation of raw materials and finished products has been developed properly. Separate area for parking of trucks has been provided in front of gate no. 3. The service road and staff concreted road is already developed. Photographs are given below</p>

<u>Photographs of concreted truck parking , service and staff road-</u>		
	   	
8	Proper parking bays for control of traffic movement within the plant area and plantation be done on the parking bays.	Proper parking bays have been developed to control the movement of traffic within the plant area and plantation is being developed in the parking bays.
9	PP must ensure to develop area of 9.9 hact by planting of 15000 trees. PP will make sure to have a green belt all around the periphery of plant area. The plants should be 3 years old.	We are developing green belt inside the plant and all around the periphery of plant area . So far, 16970 numbers of trees have been planted in about 10.0 hectare area till date. (The Photographs of Plantation enclosed)
<u>Photographs of plantation-</u>		
	 	

10	Necessary provision shall be made for fire - fighting facilities within the complex.	Provision for firefighting facilities has been made in every section of the complex. Photographs are given below
----	--	--

Photographs of fire fighting facilities-

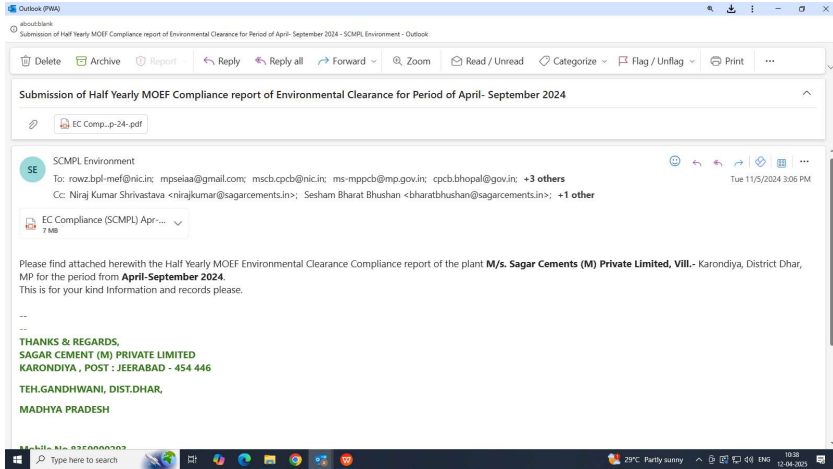

11	PP should carryout periodical air quality monitoring in and around the site including VOC, HC.	We are carrying out Monthly air quality monitoring through third party. Reports are attached for reference.
12	All environmental parameters regarding air & water should be analyzed every year and in case of any deviation from the permissible limit, corrective measures be taken for improvement of environmental conditions.	All environmental parameters related to air and water are being analyzed regularly in year by third party. Any deviation from the permissible limit will be taken on top priority and will take corrective measures for improvement of environmental conditions accordingly. Summary of reports are enclosed as Annexure -2
13	PP should plan the CSR activities as per local villagers needs and should consult district administration for implementation of the CSR activities and submit the same to MPSEIAA.	Plan for CSR activities has been identified. Rupees fourteen Lakh twenty nine thousand one hundred seventy nine only (Rs.1429179/-) in between October 2024 to March 2025 has expended . CSR details are enclosed as Annexure -3

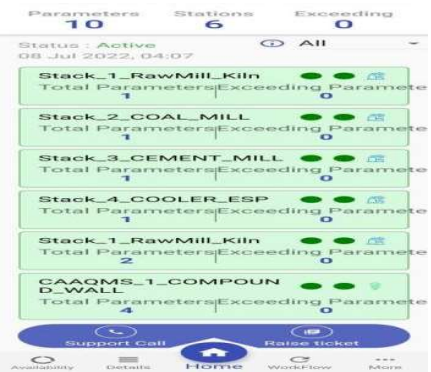

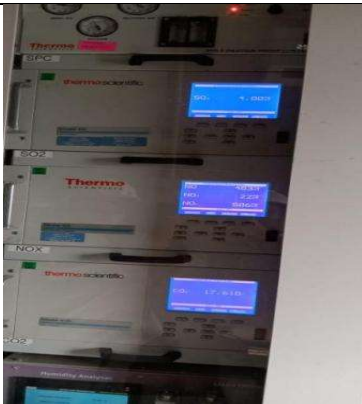

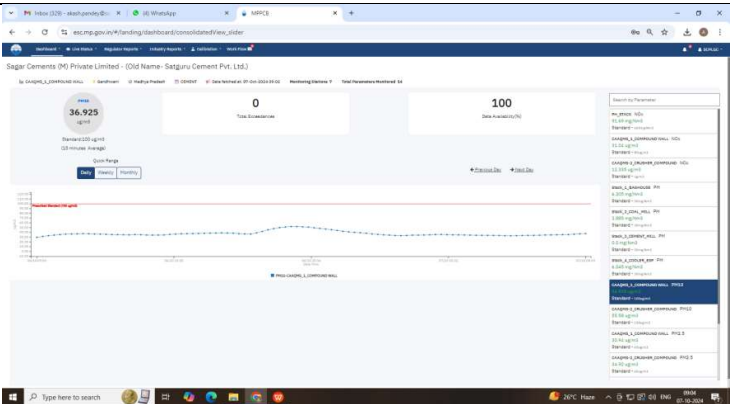

Photographs of CSR activities -

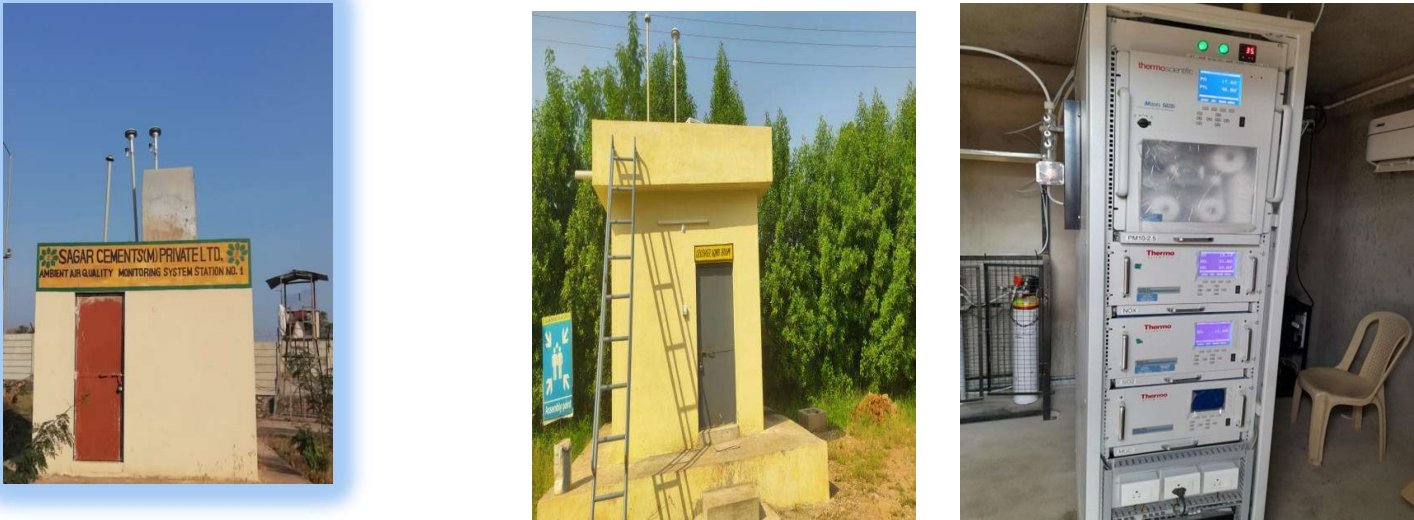

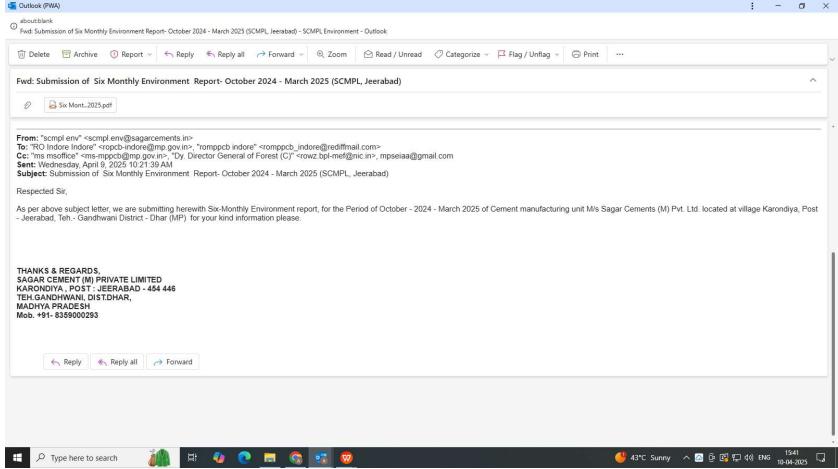

14	PP should ensure to submit half yearly compliance report and CSR	We are regularly submitting half yearly compliance report and CSR
----	--	---

	activity report with photographs of plantation in MP - SEIAA. If PP is failed to upload or submit two consecutive half yearly compliance reports of EC conditions to concerned authority (SEIAA and Regional Office, MoEF & CC Gol, Bhopal) than prior environmental clearance issued to PP will automatically be treated as canceled / revoked as per OM No. 930 / SEIAA / 2019 dated 30.05.2019 issued by MPSEIAA	activity with photographs of plantation to (SEIAA and Regional Office, MoEF & CC Gol, Bhopal). Last compliance report submitted vide latter no. SCMPL/ENV/EC/2024-25/ Dated 5th November, 2024.
		
S. No.	B. Specific Conditions I. Statutory Compliance	Compliance
i	The project proponent shall obtain Forest Clearance under the provision of Forest (Conservation) Act , 1986 in case of diversion of forest land for non - forest purpose involved in the project .	No forest land involved in the project area . Hence forest clearance is not applicable.
ii	The project proponent shall obtain the recommendation of National Board for Wildlife if applicable.	Not applicable.
iii	The project proponent shall prepare a Site - Specific Conservation Plan & Wildlife Management Plan and approved by the Chief Wildlife Warden. The recommendations of the approved Site - Specific Conservation Plan / Wildlife Management Plan shall be	Noted and agreed

	implemented in consultation with the State Forest Department. The implementation report shall be furnished along with the six monthly compliance report.	
iv	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board Committee.	We have obtained valid Consent to establish as consent no.- CTE-50442 and Consent to Operate as consent no.- AW-58645 from State Pollution Control Board and renewed on time to time.
v	The project proponent shall obtain the necessary permission from the Central Ground Water Authority, in case of drawl of ground water/ from the competent authority concerned in case of drawl of surface water required for the project.	<p>We are not extracting ground water for the plant operation so permission from CGWA is not applicable.</p> <p>We are taking water from Man river for operation of plant and taken extraction permission from WRD, M.P.</p> <p>Attached as Annexure -1</p>
vi	The project proponent shall obtain authorization under the Hazardous and other Waste Management Rules, 2016 as amended from time to time.	We have taken authorization under the Hazardous and Other Wastes (management and Transboundary Movement) Rules 2016 as authorization number - AWHP-53884 and amended H-60940.
II	Air Quality monitoring and preservation	
i	The project proponent shall install 24X7 continuous emission monitoring system at process stack to monitor stack emission with respect to standard prescribed in Environment (Protection) Rules 1986(G.S.R. No.612 (E) dated 25th S.O.3305 (E) dated 7th December 2015 (Thermal Power Plants) as amended from time to time connected to SPCB and CPCB online servers and and calibrate these system from time to time according to equipment supplier specification through labs recognized under environment (protection) act.1986 or NABL accredited laboratories.	<p>We have been installed four 24x7 online Continuous emission monitoring system in the stacks viz. Cooler ESP stack, Raw mill and kiln bag house stack, coal mill stack and cement mill stack. CEMS data has been connected with CPCB/MPPCB server.</p> <p>Photographs are given below.</p>

	  	
ii	<p>The project proponent shall monitor fugitive emissions in the plant premises at least once in every quarter through lab recognized under environment protection act.1986</p>	<p>Agreed and We are doing fugitive emissions monitoring on quarterly basis in the plant premises by third party agency which is NABL approved laboratory . Annexure-2 (Enclosed Report)</p>
iii	<p>The project proponent shall install system carryout to ambient air quality monitoring for common/criterion parameters relevant to the main pollutants released (eg. Pm10 and PM 2.5 in reference to PM emission, and SO2 and NOX Emission) within and outside the plant area at least at four location (one within and three outside the plant area at an angle of 120° each), covering upwind direction and downward directions.</p>	<p>We are carrying out ambient air quality monitoring through third party at four location at the periphery of the plant boundary covering upwind and downwind direction. Two CAAQMS station has been installed for Continuous Ambient Air quality monitoring. Annexure-2</p>

		
iv	<p>The project proponent shall submit the monthly summary report of continuous stack emission and air quality monitoring and result as manual stack monitoring and manual monitoring of air quality /fugitive emission regional office of MOEF &CC, zonal office of CPCB and Regional Office Of SPCB along with six monthly monitoring report.</p>	<p>We are submitting the Monthly summary report of manual air quality monitoring and result as manual stack monitoring /fugitive emission regional office of MOEF &CC, zonal office of CPCB and Regional Office of SPCB along with six monthly monitoring report.</p>

		 <p>Annexure-2(Enclosed Report)</p>
v	<p>Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources so as to comply prescribed stack emission and fugitive emission standards.</p>	<p>We installed 67 nos. of Bag filters including at all the material transfer points & stacks and 1 ESP to control the emission from the process and Fugitive emissions. All the conveyor belts for material transportation are covered to control the fugitive dust emission. Regular sweeping of the floors and roads by sweeping machine has been provided. Pucca cement road & flooring have been provided.</p> <p>All the four stack emission are control by the effective Air Pollution Control (APC) system like Electrostatic precipitator (ESP) , Bag House and Bag filters to comply the prescribed standards.</p>

	 <p>Cleaning By Road Sweeping m/c</p>  <p>Covered Storage shed for Lime Stone & Coal</p>  <p>Covered belt conveyor</p>  <p>Bag Filter</p>  <p>CSP</p>  <p>ESP Cooler</p>	
vi	The project proponent shall provide leakage detection and mechanized bag cleaning facilities for better maintenance of bags.	We have provided mechanized bag cleaning facility and proper maintenance schedule for bag filter for better maintenance of bags.
vii	Pollution control system in the cement plant shall be provided as per the CREP Guidelines of CPCB.	<p>All the CREP recommendation is being followed. The details are as below:</p> <ul style="list-style-type: none"> ➤ PM concentration is being maintained below 30 mg/Nm³ for all the stacks. For controlling the dust emission, bag house have been provided at major process stacks i.e. Raw mill & kiln, coal mill & cement mill. Cooler stack is equipped with highly efficient Electrostatic Precipitator (ESP) .

		<ul style="list-style-type: none"> ➤ Applicable notified standards for SO₂ & NO_x are being maintained within the norms. ➤ Fugitive dust emission controlled by providing closed storage silo for clinker, fly ash, cement and covered shed provided for coal, lime stone, raw materials(additives) and gypsum. Closed conveyor belts and dust collectors provided at all the raw material transfer points. Water spray arrangement has been provided at lime stone dump hopper & coal unloading points. Bulklers is being used for transportation of fly ash and unloading is being done by pneumatic system directly in to fly ash silo. ➤ Opacity monitors installed at all the major stacks of cement plant for continuous monitoring of (PM). continuous emission monitoring system installed for monitoring of flue gases SO₂ & NO_x in Raw Mill & kiln bag house stack. ➤ The Waste Heat Recovery System (WHRS) had been provided for power generation. ➤ Online Continuous Emission Monitoring system (CEMS) has been installed and connectivity is given to server of MPPCB and CPCB.
viii	Recycle and reuse lime fines and such other fines collected in the pollution control devices and vacuum cleaning devices in the process after agglomeration.	Dust of lime and other fines collected from pollution control devices and vacuum cleaning devices are being totally recycled & reused in the cement manufacturing process.
x	Ensure covered transportation and conveying of raw material to prevent spillage and dust generation; Used closed bulkers for carrying fly ash.	<p>The trucks and dumpers for carrying coal and other raw materials are being covered with tarpaulins. Fly ash is being transported through closed bulkers only.</p> <p>Photographs are given below.</p>

	 <p>Fly ash unloading by pneumatic system</p>	 <p>Trucks covered with tarpaulin</p>
xi	<p>Provide wind shelter fence and chemical spraying the raw material stock piles; and provide low NOx burners as primary measures and SCR /NSCR technologist As secondary measure to control NOx emission.</p>	<p>Covered storage sheds have been provided for stock piles of limestone, coal & gypsum. Fine coal, clinker, cement and fly ash are being stored on silos. Low NOx calciner provided for controlling NOx emission. Pyro redox system has been also provided to keep NOx emissions with in the norms.</p>
xii	<p>Have separate truck Parking area and monitor vehicular emissions at regular interval.</p>	<p>Separate trucks parking area has been provided near gate no.-3.</p> <p>PUC has been checked at the time of Entry in plant premises.</p> 
xiii	<p>Efforts shall be made to reduce Impact of the transport of the raw material and end product on the surrounding environment including agriculture land by the use of covered conveyor belt /railway as mode of transport.</p>	<p>There is no possibility of use of conveyor belt and railway as mode of transport of raw materials as no rail line available near plant. To reduce the impact of surrounding environment, all the raw materials are being transported through trucks covered with tarpaulin and fly ash in closed containers only and all the raw materials are not</p>

		overloaded.
xiv	Ventilation system shall be designed for adequate air changes as per ACGIH document for all tunnels, motor houses, and cement bagging plants.	Proper ventilation systems for tunnels, compressor/blower house & for packing plant have been provided.
III.	Water quality monitoring and preservation	
i	The project proponent shall install effluent monitoring system with respect to standards prescribed in Environment (Protection) Rules 1986 vide GSR No.612 (E) dated 25th August, 2014 (cement) and subsequent amendment dated 9th May, 2016 (Cement) and S.O. 3305(E) dated 7th December 2015 (Thermal Power Plant) as amended from time to time) and connected to SPCB and CPCB online server and calibrate these system from time to time according to equipment supplier specification through labs recognized under environment (protection) Act, 1986 or NABL accredited laboratories.	Not applicable as no effluent is generated from the cement plant process as the cement manufacturing is based on dry process technology. However treated water from STP & WHRB is reusing for plantation/green belt development & dust suppression purpose. Zero effluent discharge is being maintained inside/outside of plant premises. Analysis reports Annexure-2 (Enclosed Report)
ii	The project proponent shall monitor regularly ground water quality at least twice a year (pre and post monsoon) at sufficient no. of piezometers/sampling wells in the plant and adjacent areas through labs recognized under Environment (protection) Act, 1986 and NABL accredited laboratories.	Not applicable as there is no borewell in the plant. We are using Mann river water as per approval from WRD. But ground water quality of adjacent area is being monitored through accredited lab on quarterly basis. Analysis Report Enclosed
iii	The project proponent shall submit the monthly summary reports of continuous effluent testing and manual monitoring of ground water quality to Regional Office of MOEF & CC, Zonal office of CPCB and Regional office of SPCB along with six monthly monitoring report. MOM of 5th meeting of the Re-constituted EAC (Industry-I) MOM of 5th meeting of the Re-constituted EAC (Industry-I) held during 27-29th March, 2019 Page 67 to 132.	Not applicable. No effluent is generated from the cement plant process as the cement manufacturing is based on dry process technology.
iv	Adhere to 'Zero liquid Discharge.	The zero liquid discharge is being maintained & there is no discharge of waste water inside/outside plant premises.

		The treated water from STP & WHRS is being 100% utilizing for plantation/greenbelt development & dust suppression purpose.
v	Sewage Treatment Plant shall be provided for treatment of domestic wastewater to meet the prescribed standard.	150 KLD Sewage Treatment Plant for colony and 60 KLD STP for plant has been installed for treatment of domestic and sewage waste water.

Photographs of STP -

vi	Garland drain and collection pits shall be provided for each stock pile to arrest the run-off in the event of heavy rain and to the check the water pollution due to surface run off.	Covered storage sheds for stockpiles of lime stone, coal & gypsum have been provided. Garland drains surrounding the stock piles of lime stone, coal & gypsum have been provided.
vii	The Project proponent shall be practice rainwater harvesting to maximum possible extend.	We have provided rainwater harvesting in the plant premises area. Twelve Number of recharge borewell with recharge pit for rain water harvesting has been constructed for rain water harvesting.
viii	Water meter shall be provided at the inlet to all unit processes in the cement plant.	Water meters has been provided for the inlet to the critical unit processes in cement plant.
ix	The project proponent shall make efforts to minimize water consumption in the steel plant complex by segregation of use water,	Not applicable as our unit is cement plant.

	practicing cascade used and by recycling treated water.	But we are using STP treated water totally in green belt development and WHRS waste water for green belt as well as dust suppression to reduce fresh water consumption.
IV.	Noise Monitoring and preservation	
I	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional officer of the ministry as a part of six-monthly Compliance report.	Noise level monitoring is being done through accredited lab on Monthly basis and same is being submitted regularly to the Regional officer. The recent monthly data submitted vide letter no. SCMPL/Karondiya/Envt./Monit./2024-25 dated 08.04.2025 and Six monthly compliance report submitted vide letter no. SCMPL/ENV/EC/2024-25 Date 05.11.2024 is for kind reference.
ii	The ambient noise levels should conform to the standards prescribed under E(P) A Rules,1986 viz. 75dB(A) during day time and 70 dB(A) during night time.	Ambient Noise levels are being carried out by third party and within the prescribed rules. Ambient noise monitoring results carried out during the period from October 2024 to March-2025 is attached Annexure-2(Enclosed Report)

	   	
v.	Energy Conservation measures	
i	Provide solar power generation on roof tops building, for solar light system for all common areas, street light, parking around the project area and maintain the same regularly.	<p>Agreed, Solar power generation on roof tops building, for solar light system installation is done.</p> 
ii	Provide the project proponent for LED light in their offices and residential areas.	<p>Agreed and we have provided LED lighting fixtures in all office area & residential areas.</p>
iii	Maximum utilization of fly ash, slag and sweetener in cement blend as per BIS Standard.	<p>Continuous effort has been made for maximum use of fly ash in making PPC cement as per BIS standard.</p> <p>No slag is being used for production of cement as only OPC and PPC is being manufactured.</p>
iv	Maximize utilization of alternate fuels & co-processing to achieve best practice norms.	<p>Noted and System installation for co-processing of liquid alternate fuel is in the process. Plastic waste is being used for co- processing as solid</p>

		AFR.
VI.	Waste management	
i	Used refractories shall be recycled as far as possible.	Noted. We are using used refractory for internal civil construction purpose only.
ii	The waste oil , grease and other hazardous waste shall be disposed of as per the Hazardous & Other Waste (Management & Trans boundary Movement) Rules , 2016 .	Agreed. Waste oil and waste grease is being disposed of through authorized recycler as per the Hazardous & Other Waste (Management & Trans boundary Movement) Rules , 2016.
iii	Kitchen waste shall be composted or converted to biogas for further use. (to be decided on case to case basis depending on type and size of plants).	Noted, very negligible kitchen waste is being generated. But 50 kg kitchen based biogas plant installation is under process.
VII.	Green Belt	
i	Green belt shall be developed in an area equal to 33 % of the plant area with a native tree species in accordance with CPCB guidelines. Greenbelt shall inter alia cover the entire periphery of the plant.	We are developing green belt inside the plant and all around the periphery of plant area . So far, 16970 numbers of trees has been planted in about 10 hectare area till date which is more than 33 % of the total area.
ii	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.	<p>GHG emission inventory has been prepared for the plant and submitted the program for reduction of the same with six monthly EC compliance report .</p> <p>Following steps has been taken for reduction on GHG including carbon sequestration including plantation</p> <p>For GHG reduction:</p> <ol style="list-style-type: none"> 1. WHRS 5.3 MW, has been installed. 2. 33% of the total plant area is demarcated for green belt from which

		<p>33 % land has been developed in green belt/plantation and it is under ongoing process to maintain the area.</p> <p>3- Roof top Solar system has been installed</p>
VII I	Public hearing and human health issues	
i	Emergency preparedness plan based on the Hazard identification and Risk Assessment (HIRA) and Disaster Management Plan shall be implemented.	<p>On-site emergency plan has been prepared and approved by competent Government Authority.</p> <p>Annexure - 5</p>
ii	The PP shall provide Personal Protection Equipment (PPE) as per the norms of Factory Act.	Jobs specified PPEs & mandatory PPEs has already been provided to each workers as per the norms of factory act.
iii	Provision shall be made for the housing of construction labor within the site with all necessary infrastructure and facilities such as fuel for cooking , mobile toilets, mobile STP, safe drinking water medical health care, creche etc. The housing may be in the form off temporary structure to be removed after the completion of the project.	During project period, the housing of construction labor within the site with all necessary infrastructure and facilities such as fuel for cooking , mobile toilets, mobile STP, safe drinking water medical health care, creche etc. had been provided and after completion of project the temporary structure has been removed.
iv	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per factory Act.	Regular medical checkups (pre and post-employment) are being carried out regularly and record is being maintained properly as per factory act.
IX	Corporate environment Responsibility	
i	The project proponent shall comply with the provisions contained in this ministry's OM vide F.No.22-65/2017-IA .III dated 1st May 2018, as applicable, regarding corporate Environment Responsibility.	Though the unit is regularly executing number of CSR and CER programme throughout the year with various CSR/CER activities like Drinking water arrangements, Roads, Drains, Community Welfare, Education, Health, Skill development, Promotion of Sports/Culture/Spirituality etc. taken up.

		CSR/CER details are enclosed as Annexure -3
ii	The company shall have well laid down environmental policy duly approve by the board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and bring into the focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringement /deviation/violation of the environmental/forest/wildlife norms/conditions and /or shareholder /stakeholders. The copy of the board resolution in this regard shall be submitted to the MOEF&CC as part of six monthly report.	<p>The Company have well defined environmental policy duly approved by the Director. The company have well defined system of ensuring compliance and reporting of non-compliance / violation of Environmental Norms to the Board.</p> <p>System of Reporting is attached as Annexure - 4</p>
iii	A separate environmental cell both at the project and company head quarter level, with qualified personnel shall be set up under the control of senior Executive, who will directly to the head of organization.	A separate environmental Management Cell has been established with well qualified personnel are deployed who are directly reporting to the Head of Unit.
iv	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the six monthly Compliance Report.	<p>Noted.</p> <p>Well defined Environmental Management Plan has been prepared. A separate fund has been allocated for Environmental Management Plan.</p>
v	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out. MOM of 5th meeting of Re-constituted EAC (Industry-I) held during 27-29th March, 2019 Page 68 of 132 vi. All the recommendations made in the charter on Corporate Responsibility for Environment Protection	<p>Agreed.</p> <p>Environment audit as Environmental statement in Form - V is being submitted regularly in annual basis. Environment statement for the year 2023-24 is submitted as vide letter no.-SCMPL/Karondiya/Env.Stat./2023-24 dated 09.07.2024. Corporate</p>

	(CREP) for the cement plant shall be implemented.	Responsibility for Environment Protection (CREP) is being implemented.
X	Miscellaneous	
i	PP has proposed Rs. 251.0 lakh for environmental monitoring and management inclusive of green belt development and OHS aspects as capital and Rs.73.61 lakh/year for recurring expenses in the proposed EMP of this project. And under CER PP proposed Rs.319.0 lakh as capital Rs.16.0 lakh/year for recurring expenses.	Agreed and complying as per the given direction.
ii	The project proponent shall monitor the criteria pollutants level namely; PM10, SO2, NOx (ambient level as well as stack emissions) or critical sectorial parameters, indicated for the projects and display the same at the convenient location for disclosure to the public and put on the website of company.	We have established online CEMS in four stack and two CAAQMS for continuous monitoring of air quality. Also display board has been provided at the main gate for disclosure of data to the public.
	<u>Photographs of Display Board-</u> 	

iii	The project proponent shall inform the regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project. vi. The project authorities must strictly adhere to the stipulations made by the state pollution Control Board and the state Government. Vii. The project proponent shall abide by all the commitment made in the EIA /EMP report, commitment during public Hearing and also that during the presentation to the Expert Appraisal Committee.	Agreed and complied
iv	The above conditions shall be enforced, inter-alia under the provisions of the water (prevention & control of Pollution)act ,1981, the Environment (Protection) Act,1986, Hazardous and any other wastes(Management and Trans boundary Movement) Rules,2016 and the Public Liability Insurance Act,1991 along with their amendments and rules any other orders passed by the Humble Supreme Court of India /High Court of law relating to the subject matter.	Agreed and complied as per the given direction.
	Standard Conditions:	
1	The Project Shall comply with the new MOEF & CC standard notified vide GSR 612 (E) dtd. 25.08.2014 with respect to cement sector.	Agreed
2	No further expansion or modification in the plant should be carried out without prior approval of the Madhya Pradesh state Environmental Impact Assessment Authority.	Agreed
3	Cement grinding shall be carried out in the closed cement mill. Further provision of dust extraction and pollution control system consisting of highly efficient of Bag filters and ID form should be provided for cement mill, Clinker Silo, Fly ash storage silo, wagon and gypsum crushing Plant with adequate stack height. Stack	Agreed 67 numbers of efficient bag filters and 1 ESP has been provided at different transfer points and stacks for proper collection of dust generated from the process. Stacks of Raw Mill Kiln, Coal Mill, Cooler

	Emissions shall be monitored at regular interval and records maintained.	ESP and Cement mill having adequate stack height for proper air dispersion. Stack emissions are regularly monitored and records is being maintained .
4	Transportation of fly ash to the plant should be through closed /cover tankers and stored in silo without any air pollution at transfer point.	Fly ash are transported in closed bulkers and stored in silo and bag filter is provided to control dust emission.
5	Process effluent discharge is not permitted. Not waste water will be generated from production process by adoption of dry grinding process. Cooling tower will be recycled in the process, if any.	No Process water is being generated in the cement manufacturing process. Water is being recycled back in the process through Cooling tower.
6	All the pollution control device/equipment in the grinding unit shall be interlocked so that event of the pollution control device/system not working, the respective unit (s) shut down automatically.	Agreed and process developed.
7	Clinker manufacturing at plant site is not permitted under this environmental clearance.	This EC is for Integrated Cement plant (Clinker Manufacturing as well as Cement manufacturing) so this point is not applicable here.
8	Solid waste viz. dust generated shall be properly recycled and utilized in the process itself.	Solid waste as dust generated and dust collected in bag fillers are being totally recycled back in the process.
9	Regular monitoring of influent and effluent, surface, sub-surface and ground water should be ensured and treated waste water should meet the norms prescribed by the MPPCB or described under the environment (protection) act, 1986 whichever are more stringent.	No Effluent is being generated from the process.
10	Project Proponent has to strictly follow the direction /guidelines issued by MOEF, CPCB and other Govt.Agencies from time to time.	Noted and agreed
11	The funds earmarked for environmental protection measures shall be kept in separate account and shall not be diverted for other purpose. Year wise expenditure shall be reported to the MOEF & CC,	Agreed

	Gol and its Regional office, Bhopal.	
12	A Copy of environmental clearance shall be submitted by the project Proponent to the heads of the local Bodies (Panchayat and municipal Bodies), District collector and DFO as applicable and responsible for controlling the proposed project who in turn has to display the same for thirty days from the date of receipt.	Already Submitted.
13	The project proponent shall advertise at least in two local newspapers widely circulated, one of which shall be vernacular language of the locality concerned, with 7 days of the issue of the clearance letter informing that the project has been accorded environmental clearance and a copy of the clearance letter is available with the state pollution control board and also at website of the MOEF & CC, Gol and state level environment impact assessment authority (SEIAA) at www.environmentclearance.nic.in & www.mpseiaa.nic.in & and copy of the same shall be forwarded to regional office, MoEF & CC, Gol Bhopal.	<p>We have informed the public for grant of EC vide advertisement published in two local newspaper namely "Free Presss" dated 15.08.2019 and "Dabang Duniya" dated 15.08.2019. copy of newspaper advertisement are enclosed below.</p> 
14	Full cooperation should be extended to the regional officers and staff from the ministry and its regional Office at Bhopal /the CPCB /the SPCB / during monitoring of the project.	We are extending full cooperation to the regional officers and staff from the ministry and its regional Office at Bhopal /the CPCB /the SPCB / during monitoring of the project.
15	Concealing factual data or submission of false/fabricated data and failure to comply with any conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of environment (Protection) Act, 1986.	Noted & Agreed.

16	The environmental clearance shall be valid for a period of five years from the date of issue EC as per EIA Notification, 2006 Para 9.	We have completed our project with in the time after getting EC as per EIA Notification, 2006 Para 9.
17	Any appeal against this prior environmental clearance shall lie with the green tribunal, if necessary, within a period of 30 days as prescribed under section 16 of the national green Tribunal Act, 2010.	Agreed.
18	The project proponent has to upload soft copy of half yearly compliance report of the stipulated prior environmental clearance term and condition on 1st June and 1st December of each calendar yearly on MoEF & CC web portal- http://www.environmentclearance.nic.in/http://www.efclearance.nic.in /and submit hard copy of compliance report of the stipulated prior environmental clearance terms and condition to the regulatory authority also.	Agreed and being complied. We are regularly submitting half yearly compliance report of the stipulated prior environmental clearance term and condition before 1st June and 1st December of each calendar yearly . Last compliance report submitted vide latter no. SCMPL/ENV/EC/2024-25/ Dated 5 th November, 2024.
19	The environmental statement for each financial year ending 31st March in Form-V as is mandated to be submitted by the project proponent to the concerned state pollution Control Board as prescribed under the environment (protection) Rules, 1986, as amended subsequently, shall also be put on the website of the company along with status of compliance of EC conditions and shall also be sent to the Regional Office of MoEF &CC, Gol.	The Environment statement for each financial year (Form-V) is being submitted regularly to SPCB and Regional Office of MoEF &CC, Gol. The Environmental statement for the period of April 2023 to March 2024 is submitted vide letter no SCMPL/Karondiya/Envt. Stat./2023-24 date 09.07. 2024. The Status of EC compliance is being submitted regularly to MPPCB, CPCB and MoEFCC . The status of EC compliance for the period of April to September 2024 is submitted vide letter no SCML/Env/EC/2024-25 date 05.11.2024.
20	The project authorities shall inform the regional Office as well as the ministry, the date of financial closure and final approval of the project by the concerned authorities and the date of start of the project.	Noted & Agreed

मौग पत्र

एजेन्सी का नाम :- सतगुरु सीमेंट प्रा.लि. इन्दौर

मध्य प्रदेश शासन जल संसाधन विभाग बृहत् परियोजना मण्डल भोपाल का ए.पू.नि.मं./31/तक/रा.स्त.871/2018/97 भोपाल दिनांक 20/2/2019 के द्वारा कर्म सतगुरु सीमेंट प्रा.लि. इन्दौर द्वारा मान नदी से 0.323 मि.घ.मी. जल उपयोग

(1) वार्षिक आवंटित जल की मात्रा :- 0.323 मिलियन घन मीटर = 323000 घन मीटर

(2) वार्षिक दर 1.55 प्रति घन मीटर मध्य प्रदेश शासन जल संसाधन विभाग का आदेश क्रमांक/18/1/91/साध्यम/797/भोपाल दिनांक 30/11/2010

वार्षिक मांग राशि :-
 $323000 \times 1.55 = 500650$ रुपये
एक माह की जलकर राशि $500650/12 =$ रुपये 41721.00

(3) आवंटन शुल्क (एक माह के जलकर तथा उपकर) के समतुल्य राशि 41721 X 1 रुपये 41721.00

(4) धरोहर राशि (दो माह के जलकर तथा उपकर) के समतुल्य राशि 41721 X 2 रुपये 83442.00

योग रुपये 1,25,163.00

नोट - मौग पत्र में दी गई दर 1/1/2013 से प्रचलित है। यदि शासन द्वारा इस दिनांक के पश्चात् जल दरों में वृद्धि की गई होगी या भविष्य में जल दर बढोतरी के आदेश जारी होंगे तो आपसे अन्तर राशि वसूली योग्य होगी।

Note: 1.This CoA refers only to the Monitored/sampled and tested items. 2. This CoA may not be reproduced in part or full without the written permission of this laboratory. 3. CLL does not give any opinion or interpretation of the same. 4. *Sample information as Furnished by Customer 5. Prescribed Limits as per NAAQS 2009 6. BDL -Below Detection Limit, DL> Detection Limit 7. Subject to terms and conditions mentioned at the end of the CoA.					
- END OF CoA -					
IMPORTANT INFORMATION FOR CERTIFICATE OF ANALYSIS (CoA) 1. Sample(s) /Instruments are drawn and submitted by the client unless otherwise stated. 2. This certificate refers only the particular item and reported parameters submitted for calibration / analysis. 3. The results reported in this certificate are valid for the sample / instrument received as is and at the time of and under the stipulated conditions of measurement. 4. This certificate is for the customer's information only, and can neither be used in part nor in full, in any media or court of law, without prior written permission of CLL. 5. Endorsement of products is neither inferred nor implied. 6. In case of any dispute, Indore jurisdiction is applicable. 7. Perishable samples will be destroyed after testing; toxic /hazardous samples will be returned to the customer or shall be forwarded for incineration. 8. Total Liability of CLL is limited to the invoiced amount. 9. In the event, no zone is mentioned, CoA/CoC must be considered for Domestic (India) only.

SYSTEM OF ENSURING COMPLIANCES AND REPORTING OF NON-COMPLIANCE/ VIOLATION OF ENVIRONMENTAL NORMS TO THE BOARD

At Sagar Cements (M) Pvt. Limited, Jeerabad , the Environment Management Cell (EMC), headed by Deputy General Manager and supported by a well qualified & well experienced team of Environmental Manager, Officers , Engineers etc. EMC is responsible for the day to day activities related to the monitoring of environmental parameters, compliance of general and specific conditions of Environmental Clearance, maintaining records, data compilation and analysis, obtaining consents, authorization and other statutory permissions of Hazardous Wastes, ground water withdrawal etc. Any non-compliance/ violation of the environment norms are immediately reported to the unit Head, who is directly responsible to the compliances as per the law.

For the internal surveillance of the compliances and to provide technical support in resolving the environmental issues, the company adopts two tier approach, one at Zonal Level and other at the Corporate level to ensure that the units conform to the environmental standards and all other compliances, prescribed by the SPCB/ MoEF/ CPCB.

In case, any minor violation of advisory nature is observed during inspection by the SPCB/CPCB/ MoEF official(s) and communicated in writing to the plant, it will immediately be reported to the Unit Head and will be rectified through concerned departmental head. In case of major non compliance/ violation of the environmental norms or any Notice/ Direction under Section 31 A of the Air (Prevention and Control of Pollution) Act 1981 under Section 33 A of the Water (Prevention and Control of Pollution) Act 1974 under Section 5 of the Environment (Protection) Act 1986 received, is immediately reported by the Head, EMC to the Unit Head, Zonal Environmental Head, President/ Head Corporate Environment group. President / Head Corporate Environment group reports this matter to the Managing Director, Executive Chairman and to the Board of Directors of the Company. He is fully responsible for the implementation of all the decisions of the Board, related to the statutory compliances to the environmental regulation and overall improvement of the green image of corporate environment.

Environment Policy

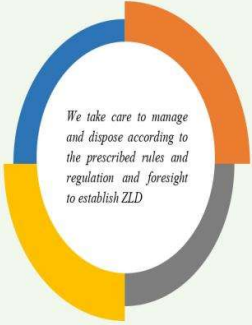

Sagar Cements Limited (SCL) is extremely mindful of its responsibility towards protecting and enhancing the environment and is committed to achieving outstanding environmental performance and continuous improvement across all its operations

The Company aims to achieve this by

- Commitment submitted to SBTi, Aligning with SBTi emission reduction goals, setting short-term targets to reduce emissions and long term target to become Net zero by 2050.
- Promoting the low clinker cements in a big way.
- Reducing CO₂ intensity through adopting the best technologies and practices across all its functions.
- Reducing energy intensity while simultaneously increasing the use of green energy and alternative fuels.
- Minimizing transport emissions by reducing lead distances and gradually migrating to environmentally friendly transportation modes.
- Improving resource use efficiency to conserve natural resources while enhancing the use of waste materials to move towards a circular economy.
- Optimizing use of essential resources such as minerals, energy, water, land etc.

- Adopting environmentally safe mining and process technologies.
- Practicing the reduce, recycle, reuse principles to reduce water intensity by minimizing freshwater consumption and achieving a high level of water harvesting to become water positive across all operations
- Assessing the environmental practices and policies of critical suppliers as part of selection process and maximizing sourcing of products and services from environmentally friendly entities.
- Deploying environment management systems across all operations.
- Promoting an environmentally aware and friendly culture among employees and all stakeholders.
- Setting objectives and targets to monitor environmental performance and periodically reporting on progress to all stakeholders.
- Complying with the most up-to-date environmental regulations and other requirements that may be in force from time to time

Minimizing environmental impact contributes to the equitable wealth of all living things
– Let us protect the world we live in with all our strength & energies.
